Skills

- HTML | Css | Sass | Bootstrap | JSON | JavaScript | jQuery | Typescript | React | Redux | Node | Express.
- C | C++ | Java | Python | Sql |NumPy | Pandas | Matplotlib | Seaborn | Scikit-learn.

Experience

Tata Consultancy Services, Gujarat, India

Front-end Developer Feb 2022- June 2021

- Coordinated the design and development of web applications of Digigov framework using the latest technologies of Html, Sass, Bootstrap, Json, Javascript, jQuery, React.
- Led the development of more than 60 screens, from identifying system requirements and partner dependencies to workload balancing, software implementation, testing, and configuring metrics.
- Handled dynamic data for more than 30 screens and collaborated with back-end developers to fetch user data and requests.
- Continuous integration, deployment, code reviews, unit/integration testing.

Quality Assurance Tester May 2021- Feb 2021

- Performed portal testing effectively, on time, with the expected level of quality.
- Created test cases and performance test scripts based on portal requirements and functionality specifications.

Education

Gokaraju Rangaraju Institute of Engineering and Technology

Bachelors in Computer Science and Engineering Oct 2020 - Aug 2016

- Cummilative GPA : 8.27 / 10
- Coursework: Advanced Data Structures, Big Data Analytics, Artifical Intelligence, Design and Analysis of Algorithms.

Academic project

Vision Sentiment Analysis - Python OpenCV June 2020 - Jan 2020

- Coordinated in the development of the algorithm that uses visual stimuli as input, preprocesses the input data, and then automatically looks for faces, identifies them, and describes the emotion detected.
- As the project's specialist, I entirely focused on the technical aspects and coded the algorithm.

Home Automation using Google Assistant - Arduino April 2019 - Dec 2018

- Developed the Arduino program and created custom commands for the Google Assistant.
- Involved in interfacing the Google Assistant to IFTTT, IFTTT to adaFruit, and adaFruit to Arduino. Despite being a group project involving four people, I have handled 70% of it.

Certifications and Badges

- Python for Machine Learning & Data Science Masterclass, 2023.
- Meta Front-End Developer Certificate, 2023.
- Programming with JavaScript by Coursera, 2022.
- Microsoft Technology Associate: Networking Fundamentals - Certified 2017.
